## Novolence® water-saving hand shower

- **Strong turbulence water jet**
- **G1/2 connection - fits any usual shower hose**
- **Punched disc protects against limescale**
- **Saves up to 65% water and energy**
- **No maintenance necessary**

The Novolence® shower head ensures a maximum of comfort and a minimum of water consumption while having a shower. The innovative, patented 3-hole-nozzle made it possible to achieve a completely new level of performance regarding shower comfort and water jet characteristics.

The Novolence® shower head has three accurately calculated orifice outlets. That makes the »Novolence Shower Head« insensitive against limescale and blockage. This construction ensures that the water jet is mixed with much oxygen, also at low pressure, and makes the jet very comfortable and smooth so that the user will not recognize a difference to an ordinary shower head.

Moreover, flow rate and shower pattern can be adjusted according to your personal preference by changing the turbulence and punched disc (2, 3, 4 or 12 holes as required).
